

# General Hospital - Patient Summary

Patient Name: John Doe

Date: 2023-10-27

Subject: Lab Results Review

Clinical Notes:

The patient presented with fatigue and mild dizziness. Blood work was ordered to investigate potential causes.

Results:

1. Hemoglobin: 11.5 g/dL (Low). Reference range: 13.5-17.5 g/dL.
2. Ferritin: 15 ng/mL (Low). Indicates iron deficiency.
3. Vitamin D: 20 ng/mL (Insufficient).

Diagnosis:

Iron Deficiency Anemia.

Recommendations:

- Begin oral iron supplementation (Ferrous Sulfate 325mg daily).
- Increase dietary intake of iron-rich foods (red meat, spinach, beans).
- Follow up blood work in 3 months to monitor hemoglobin levels.
